## Photography and Video Guidance

There may be times when the Press, media, professional photographer or other Parents and Carers will wish to photograph or video events, practice sessions or matches that Mersham Sports Club organises.

We will publish in the Pavilion at Mersham Sports club, guidelines as to what is appropriate, in terms of content and behaviour of all those who might wish to record an event. We will also endeavour to inform our members if a photographer or the media will be at an event, recognising that often we are not informed of this until it happens.

It may be that Mersham Sports Club would like to use such images as part of our website, social media or other advertising to promote the club and events. If we publish any photographs or videos ourselves, then we will not publish, at the same time, the names of any junior members in the photograph or video.

We will not knowingly permit photographs, video or other images of the Junior Members who play for Mersham Sports Club to be taken without consent.

All members will be given the option to agree or disagree to images of them being taken during club activities when applying for membership of the club.
